

Dear Store Manager or Buyer,

I would sincerely appreciate if you would consider carrying Community Grains products in your store(s).

Community Grains makes a variety of TRUE whole grain pastas, flours, and artisanal polentas, and also offers a selection of dried heirloom beans. Using a proprietary milling process their whole grain products have a different and delicious full flavor not usually associated with whole grains foods. All Community Grains products are grown in California and are free of GMOs, trans fats, and are kosher certified. They offer both organic and conventionally grown pastas, and polenta. But most important: their whole grain flour and pasta is like no other & tastes amazing.

Community Grains products would appeal to many of your customers who are interested in eating whole foods packed with nutrients, that are minimally process and handled with care. This would no doubt be a popular offering with your customers.

To request product samples and information, please visit www.communitygrains.com

Thanks for your consideration!
